IDENTIFIERS United States; Vocational Education Amendments 1968

ABSTRACT

This publication provides a listing of federally funded state-administered research and development vocational education projects which were conducted in 1976 under the provisions of the Vocational Education Amendments of 1968. The listing is arranged alphabetically by states and for each state includes the total funds allotted and obligated for grants and contracts, the title of each project, the name of the grantee or contractor conducting the project, and the amount of funding obligated for the project. INTRODUCTION

Section 131(b) of Part C of the Vocational Education Amendments of 1968 provides Federal funding for State-administered research and development activities in vocational education. These Federal funds can be used for paying up to 75 percent of the costs of the State Research Coordinating Unit (RCU) and for grants and contracts covering 90 percent of the costs of research and/or developmental projects. The funds are allocated to the States on the basis of a population formula prescribed in Public Law 90-576. In Fiscal Year 1976, for example, the State of Alaska received $16,450 while the State of California received $962,956.

The total funding appropriated for State use under Section 131(b) of Part C amounted to $17,872,215 in Fiscal Year 1972 and $9 million in each succeeding fiscal year. The States used a portion of this funding to assist in meeting the maintenance and operational costs of the State Research Coordinating Units. However, the major part of the funding was used to support grants and contracts with local school districts, universities, and other agencies within each State for the conduct of vocational research and development projects.

The purpose of this publication is to provide a listing of the projects supported in each State through grants and contracts funded by the States under Section 131(b) of Part C of the Vocational Education Amendments of 1968. The listing, which is arranged alphabetically by States, shows the title of each project, the name of the grantee or contractor conducting the project, and the amount of Section 131(b) funding obligated for the project. For any given State, the total amount of funds obligated in a particular fiscal year may or may not be equal to the State's allotment for that fiscal year. There are two reasons for this difference between funds allotted and funds obligated for grants and contracts. The first reason is that a State may at its discretion, reserve some portion of the State allotment for support of the State Research Coordinating Unit, using the remaining amount for the award of grants and contracts. The second reason is that, under the provisions of the Tydings Amendment, a State could carry unused funds over and obligate them in the following year.

The listing of State-administered research and development projects was compiled on the basis of information supplied to the U.S. Office of Education by each State. Additional descriptive information on each of the projects may be located in the "Research Projects in Progress" section of Resources in Vocational Education (RVE), a journal which is published bi-monthly. Persons wishing more detailed information about a particular project than that contained in RVE should correspond with the Director of the State RCU in the State concerned.

This publication has been prepared by Larry Braaten, Chief, Demonstration Branch and Annette Miller, Education Technician, in the Division of Research and Demonstration.
